Title: Current_Schools

Geospatial Data Presentation Form: vector digital data

Description:

Abstract: Point dataset of Texas regular, charter, and alternative schools, excluding disciplinary alternative ed. (DAEP), juvenile justice alternative ed. (JJAEP) institutions, and the Windham school district. This shapefile underlies the published feature service of the same name. The WEB attribute is no longer displayed on the SDL popup because it was, in some cases, causing the link to the TAPR report not to be displayed. The TAPR report is on the SDL requirements list (and WEB is not), therefore WEB had to go. When updating this data, I *strongly* suggest you download it, modify the downloaded copy, then use the "Overwrite" button to the right to upload your changes and over-write the entire dataset. While it is possible to edit the data using ArcGIS for desktop directly from this feature service, the process is clumsy since you cannot see all of the features at once. Even worse--once you do that, the data cannot be subsequently over-written. The data ends up being enabled for disconnected editing, which AGOL does to prevent you from stepping on someone else's potential offline edits. You then have to drop and re-publish the feature service, which means you have to then correct the URLs in the public open data site, and make sure the SDL map application can still find the data. So, in practice it turns out to be way more trouble than it is worth to directly edit via the desktop.

Purpose: Created to support the Texas Education Agency's online School District Locator app.
